JOSEPH I. BATES.

Do yng remember, Sweet,
A summer long ago...
A quiet village street Ila houses all a-raw; Broad elin trees shading each, flay woodhine clasping one, A little lawn'n clear reach

In the sun! As like as nest to nest, When roldns build and alog, With rapture in the breast, Through all the days of spring! As like as bad to bad, When early snowdrons glow.

> Yet never breast of bird But knew its chosen rest, And never heart but stirred The sweeter for its nest. Twas not the wouldne spray.

Nor light of sprinkling flowers. Twas love with khelling ray. Oh, simple were our cares, And all our store of wealth

Was daily fave and prayers, Plear hope, abiling health Our learts with youth were light
And the burdens of the day
The greeting kiss at night Could repay.

Those minimer days are done, The autumn winds are cold, We shiver in the sun; Tis late, and we are cold; Atready on our sight

Heaver's aimy mansions glow With luster pure and leight — Let us go. t wonder-will it be A palace large and free, Where we shall find our hime; Or just a sheltered neek,

I lasped in the woodbine's fold, -1Ida Whipple Bentiam.

Sawlag an Allspice tirore.

The planters of Jamaica long ago found out that the birds can make much better pimento or allspice groves than can be made by man. As a consequence the work of planting, or more properly of sowing, is left entirely to the birds, man's share of the labor being conflued simply to chopping over the piece of woodland which it is proposed to convert into a spice grove.

The Humphrey Family.

Parts hand to of the "Humphreys" Family in America," have been issued by the Humphreys Print, of New York, these two parts giving the record of the Dorchester and Weymouth branches of the family, the latter compiled by tid-bert Nash, Esq., of this town. The work comprises about 1120 pages, and gives viduminous genealogical detailof tamily descent from Jonas Jimphrey, of Dorchester, of the first generaland. Fuder the 2d family head is Elder James Humphrey, who came with his father from England, and died in Dorchester, and under head of (Fauilly 3 is Deacon Jonas Humphrey, born in England, who came to Horchester with his father, Jonas, and was the first of the family to settle in Weymouth, what date is uncertain. He resided of Neck street, Old Spain, and was a ma of great capacity and influence, sorving nany years as selectman and deacon o the First clorreli. Samuel and Nathan iel, his sons, came to Weymoutle with Islamk. The children born to Hencor Junus after his removal to Weymouth were Jonas, who served in the canonign James, who was many years town clerk, treasurer and selection. The Quincy Advertiser gives the esinnate of the parties interested in builderal villages of Quincy, which in substance is as follows; It was proposed to build 'a line from the Centre to the Quincy Point bridge, and another from Rochester, N. Y. reenleaf street via. Ilnngock, School and Franklin streets to South Quincy. und thence by Wuter and Copeland streets to West Qumcy. The length of noth lines, side tracks and all, was by actual measurement four miles and seventy-utue rods. A T rail without payng would cost \$4,000 per mile; with paying \$5,000. A sixteen foot close cur for Iwo horses would cost \$8501.

Virtues of the Cactus.

It amuses a person from the western part of our country to see people califysting as a rare plant a thing that is the pest of the plains. I mean the common cactus, which I have seen in meny green houses and gardens in this city. With us it is an intelerable nulsance, and one would as soon think of cultivating a particularly active set of fleas and misquitoses. But the cactus has one sirtle that would be highly appreciated if known in this city, where the water is more in oeed of a bath than the difficular titles city, where the water is more in oeed of a lath than the difficult inhalitant. When split open the cactus is far better than any filter for clearing and settling water. A single blade will make twenty gallons of Mighshippl water as clear as crystal, and will leave in amplessant taste as a reminder of its while open cars would cost \$625. Good econd hand bob cars could be obtained; at from 83 m to 8400 ench. Tan stables Mississipli water as clear as crystal, and will leave no anglessant taxts as a parintider of its use. As an antiscorbatic it is also most effective, and is freely used on the plains for this parpose. The cactus is, therefore, not without its value, but as an ornamental shrub it appears to me to be a complete failure.—John flestwick in Globe-Democrat. one at each end of the route, could be built for \$8,000. will bring the town within thirty minestree days of and lang syme. As everybody knows, we came hither under compulsion that thus far we have remained. Hence, if in some of the things I write I seem enthusiastic, no one need accepte me of whistling to keep my contage mp on think I imply that half the people in Weymouth ought to followen example. I lifelieve few meonle in the world are the Gordian knot so tar as regards the liquor question. A few of them came I believe few people in the world are more countertably fixed than the aver-ize citizen of Weymouth. And unless weymouth man teels obliged to make

Thefieve few people in the world are many countertaily fixed than the average citizen of Weymouth. And unless a Weymouth man teels obliged to make the change for purposes of health, or has some capital, I should be slow to urge his removing to Southern California, without first looking over the ground, or, if that were not feasible without assurance from some friend now here, that steady enployment awaited him in a certain locality, upon his arrival. Still, I confess the charm of California life gets a stronger hold upon me mouth by mouth. The sweep of the mouth symbol. The sweep of the confession is tremendous. For mia life gets a stronger hold upon me mouth by month. The sweep of the new civilization is tremendous. For xample, official figures show that real bestate transactions in this county of Los Augeles, during last week alone, amounted to more than three million amounted to more than three nullion bollars, am have averaged more than ten millions a month since the year came in. The San Francisco Examiner says sixly thousand visitors to Los Angeles are already booked by the overland railroads for the coming winter. If we may judge the future by the past, a large proportion of these new comers, having sampled the country for themseless with decide to make it their selves, will decide to make it their place of permanent residence. But the almost imparableled development of

this region is not due to natural teatures alone. Neither is it mainly the result of advertising. A very important cause is railroad competition. Until within a short time the Southern Paeitic had a practical unonopoly of rail-road traffic in all this southern country until the Atchison & Santa Fe, having broken through the great Cajon Pas from the north, swept through this San Gabriel Valley, made Los Angeles its chief western terminus, and then pushed on to tide water. Thereupon the Southern Pacific suddenly saw a the Southern Pacific suddenly saw a great light. The result was a marked improvement in its bearing toward a long suffering public. It is an ancient adage that wherever comes the river Nile, there comes life. The same hay le said of the Santa Fe road. Having become one of the largest corporations in the world, it employs upon its several lines about tity thousand men. With its liberal policy, Hoston capital and Beston management, it is an institution of which a Massachusetts man may well be proud. As the Inter-State innon of which a Massachusetts flati may well be proud. As the Inter-State Commission frowns upon the free pass system, I will add that the above me truthful words, unbought. Both these roads to which I have referred, running parallel through the entire length of the valley before us, are, for miles, in view of our windows. Their tradic is cucrnous. It would seem as it their rails must be hel night and day. While at the breakfast table we often count lve trains in sight at the same moment, speeding east or west over the Southern Pacific. Sierra Madre Is on the Sauta Fe. That roud has ten passenger trains

judging from reports in eastern papers, I conclude that of all Unche Saut's chil-dren, we in Southern California and our fellow citi≱cus in Alaska, are the only ones who thus far have passed a comfortable season. If any friend i compelled to try this climate for relic Fe. That roud hasten passenger trains a day passing this point. As the overland is one of these, and the Raymond Hotel is only six miles beyond us towards the west, I hereby extend a cordial invitation to all Weymo, the and Braintree Friends to stop off and take with us a cup of tea on the last evening prior to their arrival, next winter, at that famous hoslejry.

A word as to the quality of the population now coming into Southern Cajibardia. If anybody imagines the people here to be living the average trouon a winter's residence for that pose. Physicians here claim tha unmuers are even more beneficial than summers are even more heneficial than the whater. I believe it thoroughly. It's the day air that heads sure lungs. But does some reader think my picture rose colored, as if there are no "outs" incident to California hie? Yes, many, I will suggest a few. First, there is a great scarrity of the following:—green grass, thunder showers, hand organs and book agents. And, in this neighborhood, an obsoint dearth forms. If anybody imagines the peo-ple here to be living the average trou-tier life he has about as intelligent an idea of the situation as that of an ac-quaintance of mme in New Humpshire, who, soon after I was settled over the this neighborhood, an absolute dearth of these:—snow and killing frost, coal sifters, dog days, mosquitos, sturstroke, salt pork for baked beans, and dogs, quantance of nine in New Hampshire, who, soon after I was settled over I in-ion church, asked me if Weymouth was on Cape Cod, and made a remark indi-cating that he supposed Weymouth pen-ne to be reinerable monorial. salt pork for baked beans, mad slegs, putato bags and hydrinias rod men. But I will now name what are, for neather two most actious defects of this coast. The first 1s the fact that for neither hove nor money can I get a rosst of heef like that to be had from. Worster's market or Martin's eart. Second, I can best express by repeating the answer of a Chinaman when I a-ked him whe he short on with the slept of martin's care. saving that nesupposed weymouth pro-sle to be principally engaged in grow-ing cranberries and drying itsh. So lar is I have observed, almost the currer-ady of new coners to this part of the, tate are native born Americans. We is

Fountain of Youth. It is posted in Los Augeles county. If any old fellow in your region suspects that he is becoming too venerable in appearance and feeling, and wishes to layet back a dozen years, let him rome out to Souther California. The region is a larger proportion of college graduates than Southern California and go into business. He will be moving on the double quick within a month. Seriously, the extent to which middle aged men and women coming from the east receive a new increment of spirits and enthusiasma until this intense life of the Pacific coast, seems to me remarkable. There is to be seen here the youngest sort of old folks I ever met. Southern California is well litted to become a kind of puratise for the aged; and the reasons for this are apparent. Freedom from extense of heat and cold, with sunny skies three humbred days in the year, not only tensite prolong life, but after the most invariably affords marked improvement in health to persons a censtromed to a climate less kindly. And furthermore, my man or woman who can do any neefful work, mechanicalling telectual or moral, is waited here. But, Mr. Editor, I have not set for myself the work of producing the regulation southern California in the case of the work of producing the producing the proportion of the control of the work of producing the producing to the proportion of the proportion of the control of the work of producing the producing to the proportion of the control of the work of producing the regulation of the producing the regulation for miral, is waited here. Probably thousands of town lots have been sold in Southern California in three years, where every dired that was drawn contained the stipulation that the property was to revert to the original owner in case intoxicants were every sold upon the premises as a beverage. As no ten minutes chart with one's old neighbors would be complete with one's old neighbors would be complete with contained that it has become assual proposed. As no ten minutes chat with one's old neighbors would be complete without some discussion of the weather, I wish to say I have made the important discovery that it you must submit to either process, it is more agreeable to be baked than boiled. We all know that a dry atmosphere is very essential to emburing an extreme degree of heat or cold. But I never appreciated that fact as now. It is no California yarn when it is affirmed that a temperature of a handred here can be as easily chattered as one of minety at home. It is The chief obstacle, of course, Is liabit, so long continued that it has become second multiple;

or cold. But I never approciated that fact as now. It is no California yarn when it is adiruned that a temperature of a hundred here can be as easily charlest as one of ninety at home. It is certainly true that I bid not suffer more discountert the other day when the glass stood at 10% in the shade at the north cud of my house, than I did last summer when the same glass recorded 92 in my simily at home. The increary has been above one hundred on several days and with a clear sky, and yet, so tar as I can hear, men employed upon the outside of buildings of in the field, did not think of leaving their work by reason of the heat. It is chained that sun stroke is auknown. We have the trade wind during the day from about 10 A.M., and a light mountain breeze at night. For comfort the evenings and nights are perfection. In coming hither the question of our addity to enharce the summer heat was to one on the consumers with their pane, the condition of water. ONE MILE SIGNAL WHIST'LE

When Janie Milked the Cown. The dainy held her dainty cup
To eatch the dew drops bright;
The hee had kissed the clover bobs, And bade them atl good aight; The katvelid had tuned her song Among the apple boughs, and farther stretched the sholows long, When Janie milked the cows.

The awallows flitted here and there,

The availors intel nere and there,
The bat that left his lewer,
The primrose with a basiful air,
Lucloset her publish plaintivatale
Proclaimed heath wesded boughs, And twilight dropped her dusky veit, While Janie milked the cows. And Ben, the plow-tay, strolling by, Comes through the open bars, While softly in the western sky Sldne out the tranquil stars.

And while the can blades whisper low, Ewo lovers pledge their views, Amid the twilight's gurple glow, While Janie milked the cows

The simbeams, peoping wiftly through, Lie dancing on the floor. And when the first puls evening stars Shine through the forest longles, Young farmer Ben, beside the bars, Helps Janie milk the cows. -- Ifelen Whitney Clerks.

The sun had long since dropped he hind the serubby 'juck oaks' on Hicks' Kuob. There was no moon in sight, but the dancing stars that, winking and blinking so merrily at each other, seemed mildly flirting the night hours away, shed a subtle gicam of light down ipon the winding road. At either hand the dense forest of Southern Missouri stretched away, broken only by the knolls ("knols" the squatters call them) that reared their scraggy beads at nnexected places. Far off to the right s deepy rain-crow, that had been lustled off from his perch by his uneasy mate, nawking cry, which sounded much as f his vocal organs sailly needed oiling. The shadows at the foot of the great
